

MICRO SERIES OF PRODUCTS

MICRO 系列移动桥式测量机是一款适用于小型工件检测、制作逆向工程的经济型、高效率三坐标测量机。

自身有自带工作台，敞开性好（三个方向都可以搬运送件），采用国际先进的有限元分析技术设计的精密横梁，并采用刚性好、质量轻的全封闭框架移动桥式结构。其主机占地面积小，测量效率高，与固定龙门式测量机相比较其承载能力更强。配置多元化的测量附件，可实现自动及半自动方式完成各项测量任务。可满足现代制造的 80% 工件的检测需要，可广泛使用在车间现场、质量控制、设计、工艺等各个部门。

Micro Series Moving Bridge CMM is a kind of practical measuring machine to measure small work-pieces and carry out reverse engineering.

Three axis adopts of quality granite beam and the mechanical overall structure adopts strong rigidity, light weight and close frame movable bridge structure, which is simple, compact and has strong loaded capacity and good moving performance.

The main engine has small footprint and high efficiency, which has large loading capacity with fixed gantry structure. It is also adopts various accessories to realize auto and semiauto measuring projects. Moreover, it is can also meet 80% measuring needs and can be widely used in the plant site, quality control, design, craft and other departments.

产品特征：

轻便、灵巧的小型高精度测量系统。

提供全套最经济的测量解决方案。

优化的结构设计提供可靠地测量性能指标和效率指标。

多种丰富配置完成各种复杂测量要求。

完整的尺寸规格，满足各种中小型工件的测量需求。

可加配非接触式测量系统。

Smart ,smaller size and high accuracy measuring system.

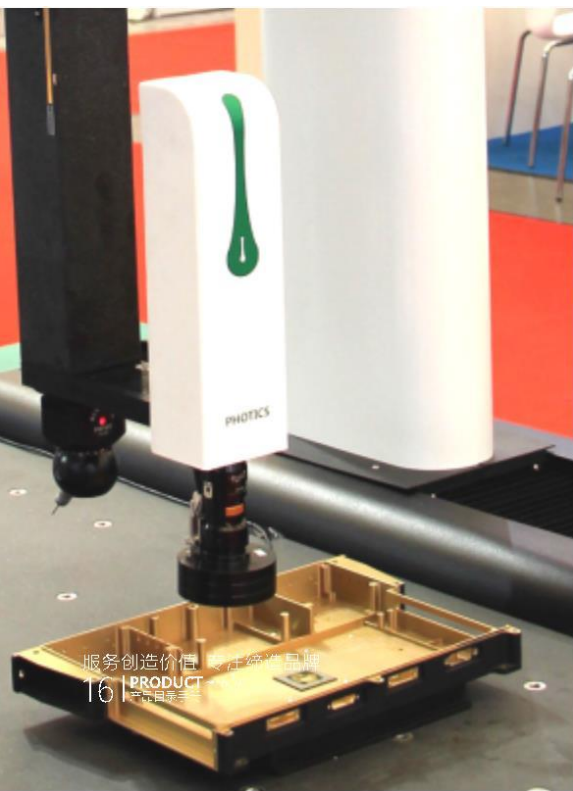

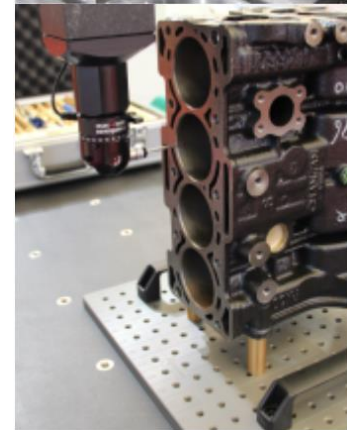

Providing full set most economy measuring solution.

Providing the reliable measuring functions and efficiency based on its excellent structure.

Different kinds of configurations.

推荐选配探测系统

Recommended Probe System

应用于汽车、电子、模具、教育等行业

设备规格：Micro575、Micro686、Micro7106、
Micro8106、Micro9128、Micro9158、
Micro10128、Micro10158、Micro10208、
Micro121510、Micro122010、Micro152112

Equipment Parameter

测量范围(mm):X(500~1500) Y(700~2100) Z(500~1200)

承重(kg):1000~1900

空气压力(MPa):0.6

示值误差(μm):1.8+3.3L/1000起

详细机型参数，请咨询本地办事机构。
